2016 COMPETENCIES ASSESSMENT TOOL

he American College of Healthcare Executives Healthcare Executive Competencies Assessment Tool is offered as an instrument for healthcare executives to use in assessing their expertise in critical areas of healthcare management. We trust you will find this latest edition of the assessment tool useful. ACHE updates the assessment annually to continually improve its value to you.

The competencies are derived from the Healthcare Leadership Alliance* Competency Directory (www. healthcareleadershipalliance.org). The competencies in this self-assessment tool comprise a subset relevant to management and leadership tasks typically performed by members of the American College of Healthcare Executives, regardless of work setting or years of experience.

The self-assessment is designed to help you identify areas of strength and areas you may wish to include in your personal development plan. You may choose to have your immediate supervisor use the tool to assess you and then compare results from your self-assessment with perceptions from your supervisor. Used in such a manner, the competency self-assessment can be a powerful tool in facilitating feedback about gaps in skills necessary for optimizing performance.

Healthcare organizations also may choose to use this assessment tool and the components of the HLA Competency Directory to better define the requirements of specific roles within the organization. Once defined, the organization then can respond with a targeted training and development plan for those roles. Certain tasks also may require teams with a blend of strengths, and the self-assessment tool can be used to arrive at an ideal skill mix among such teams. As pointed out by Mary E. Stefl, PhD, professor and chair, Department of Health Care Administration, Trinity University, San Antonio, "The HLA competencies provide a common framework and lexicon for a variety of healthcare managers in a range of roles and settings; they serve to define the field. They can be used for individual as well as team self-assessment and improvement. Some teams may need common skills and knowledge while others may benefit from individuals whose skills and knowledge are complementary."

Within the HLA Competency Directory, the competencies are categorized into five critical domains: Communication and Relationship Management, Leadership, Professionalism, Knowledge of the Healthcare Environment, and Business Skills and Knowledge. The definitions for the domains are as follows:

1. Communication and Relationship Management

The ability to communicate clearly and concisely with internal and external customers, establish and maintain relationships, and facilitate constructive interactions with individuals and groups.

Communication and Relationship Management includes:

- A. Relationship Management
- B. Communication Skills
- C. Facilitation and Negotiation

^{*} In addition to the American College of Healthcare Executives, other members of the Healthcare Leadership Alliance are: American Association of Physician Leadership, American Organization of Nurse Executives, Healthcare Financial Management Association, Healthcare Information and Management Systems Society, and the Medical Group Management Association.

2. Leadership

The ability to inspire individual and organizational excellence, create a shared vision and successfully manage change to attain the organization's strategic ends and successful performance. According to the HLA model, leadership intersects with each of the other four domains.

Leadership includes:

- A. Leadership Skills and Behavior
- B. Organizational Climate and Culture
- C. Communicating Vision
- D. Managing Change

3. Professionalism

The ability to align personal and organizational conduct with ethical and professional standards that include a responsibility to the patient and community, a service orientation, and a commitment to lifelong learning and improvement.

Professionalism includes:

- A. Personal and Professional Accountability
- B. Professional Development and Lifelong Learning
- C. Contributions to the Community and Profession

4. Knowledge of the Healthcare Environment

The understanding of the healthcare system and the environment in which healthcare managers and providers function.

Knowledge of the Healthcare Environment includes:

- A. Healthcare Systems and Organizations
- B. Healthcare Personnel
- C. The Patient's Perspective
- D. The Community and the Environment

5. Business Skills and Knowledge

The ability to apply business principles, including systems thinking, to the healthcare environment.

Business Skills and Knowledge includes:

- A. General Management
- B. Financial Management
- C. Human Resource Management
- D. Organizational Dynamics and Governance
- E. Strategic Planning and Marketing
- F. Information Management
- G. Risk Management
- H. Quality Improvement

Healthcare executives should demonstrate competence in aspects of all five domain areas. As you work your way through the self-assessment tool, we hope you will find it valuable and that it helps you along the path of lifelong professional education as you face the ongoing challenges of leadership. We have made it available as a PDF file at ache.org/CareerResources and hope you will share it with other healthcare executives.
